PROFILE

A self-starter, attentive to details, thrifty & resourceful in finding the right solutions. I am very fascinated about evolving Web Technologies. Front and Back are two ends and i try to make them meet.

PROJECTS

- **Developed Dynamic Commercial Website - 2018**
Tools - PHP, Laravel, Bootstrap, jQuery, JS, Less, Git tools
Executed full-stack web development project, with an emphasis on front end features, browser manipulation, and cross-browser compatibility. Assisted in development of back end features in PHP. Also developed fully functional responsive prototypes based on Business Requirements. Participated in projects in all stages of the product life cycle.
- **ATM status finder - 2017**
Tools - NodeJs, HTML, CSS, Firebase, Google Map API
Designed a prototype website for searching user rated ATM status on cash availability. Using Google Maps APIs to give the location of different ATMs and user provided status of ATMs to give the working of ATMs. Firebase services like database and authentication was used to give a real time database and authentication service for user
- **Chat Application Program - 2015**
Tools - NodeJS, HTML, CSS, MySQL, Computer Networks
Created chat application based on Server-Client design, Where a user can initiate Chat server host for various clients to join and communicate with the help of sockets. Features like emojis & Stickers Included.
